

DUVALL

CATERING | BAR | FLORAL | DÉCOR

To our brides, clients, team members and industry partners, all of us at Duvall Catering and Events are committed to keeping you safe and healthy. Please be assured we are taking the following steps to ensure you and your guests will be comfortable working and interacting with our team for your special occasions and festivities.

We constantly are monitoring DHEC and CDC safety guidelines to follow in our offices, kitchens, prep areas, and on-site at events. We have treated our entire facility with a non-toxic substance to ensure there is no presence of the virus in any portion of our building.

We are monitoring and evaluating the wellness of all team members, including daily temperature checks and health evaluations. Anyone with any sign of illness will be required to stay at home or will be asked to return home.

We have increased the availability of hand sanitizer to employees and will have sanitizer on all bars and food stations for staff to access while serving your guests.

We have increased the cleaning and sanitizing of 'high touch' equipment and food preparation surfaces throughout our facility.

All staff are required to wear masks both in our facility and at events, to use gloves for all single-use tasks, and to practice social distancing as best they can during all phases of the event, from set-up to breakdown.

We have assessed our menu and have modified our serving procedures and presentations to ensure as little contact as possible between guests and staff, while still offering the service level for which we are known. Guests will be required to remain six feet away from all food locations until food is presented. This will allow for the recommended social distance and prevent air-borne pathogens from reaching food items.

As always, thank you for your support and patience as we implement guidelines to keep everyone safe and healthy, and for choosing Duvall Catering and Events for your special event. We look forward to seeing you soon!
